MAR-25-04 3:20PM;

PAGE 5

1 Plaintiff National Credit Reporting Association, Inc. ("NCRA"), a non-profit trade  
2 organization of independent consumer credit reporting agencies, commonly know as "credit  
3 resellers," on behalf of the general public, by and through its undersigned attorneys, brings this  
4 action based on information and belief and the investigation of counsel, except for information  
5 based on personal knowledge, against Experian Information Solutions, Inc. ("Experian"),  
6 Equifax, Inc. ("Equifax") and TransUnion, LLC ("TransUnion") (collectively, "Defendants"), for  
7 relief under California's Unfair Business Practices Act, Business & Professions Code § 17200,  
8 and alleges as follows:

### 9 NATURE OF THE ACTION

10 1. Plaintiff's membership is composed of independent consumer credit reporting  
11 agencies, a significant number of which are California businesses that purchase for resale, credit  
12 information contained in the databases maintained by the three Defendants. This action concerns  
13 and is brought to enjoin Defendants' unfair, deceptive and anticompetitive business practices in  
14 the market for consumer credit reports. These practices have had, and threaten to continue to  
15 have, the effect of lessening competition and promoting the acquisition and maintenance of  
16 monopoly power of the Defendants in this market. These anticompetitive practices have had, and  
17 will continue to have, an adverse effect on consumers and businesses in California and the  
18 general public, in that they have the effect of increasing prices for credit reports and related  
19 services, diminishing the quality and variety of credit information products, discouraging  
20 innovation and choice in the market, restricting the output of credit reports and related products,  
21 perpetuating errors resident in the consumer credit information databases maintained by the  
22 Defendants and discouraging and eliminating the market factors and market forces which have  
23 the incentives and the capabilities to promote the correction of errors in those databases on behalf  
24 of California residents seeking access to credit. The perversion of these markets by Defendants'  
25 anticompetitive practices and the perpetuation of Defendants' erroneous databases has  
26 widespread negative effects on Californians because of the fundamental importance credit  
27 information has to the availability and price of basic consumer products and services such as  
28 credit, employment, housing, insurance and utility service.

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:20PM;

PAGE 6

1           2.     Credit reports are fundamental elements in lending, insurance, employment,  
2     tenant, and utility service decisions. All consumers have a vital interest in the accuracy of their  
3     credit reports and the credit scores that are now routinely generated from the data in those reports.  
4     Current studies of the accuracy of credit reports and credit scores indicate that errors and  
5     inaccuracies in consumer credit information maintained by the three dominant credit bureaus, the  
6     Defendants in this case, are pervasive, wide-ranging and substantial. These credit report errors  
7     can have a devastating impact on the consumer – a denial of credit, insurance, employment,  
8     housing or utility service or, if not outright denial of credit, insurance or housing, a marked  
9     increase in the price or diminution in the quality of those products as consumers, based on  
10    erroneous credit information, are wrongly identified as higher credit risks than an accurate credit  
11    report or score would indicate.

12           3.     Given the harm such errors can cause consumers, it is imperative that market  
13    forces and structures which tend to promote the consumer's ability to easily and quickly obtain  
14    correction of their credit information (specifically to secure the elimination of negative erroneous  
15    information and the inclusion of positive information) not be undermined by unfair deceptive or  
16    anticompetitive business practices. Quickly correcting the frequent credit information errors in  
17    the massive databases maintained by the Defendants in mortgage credit transactions has been one  
18    of the primary products and benefits offered by the customer service oriented members of the  
19    NCRA, credit report resellers who purchase consumer credit information from the Defendants  
20    and resell it to clients (such as mortgage lenders) who deal with consumers seeking credit. Credit  
21    resellers are service-intensive businesses who can and do react quickly as intermediaries between  
22    the mortgage lender and consumer and the Defendants in taking action to correct erroneous  
23    information in consumer credit reports generated by the Defendants and facilitating rapid  
24    rescoring of consumers' credit scores within the frequently tight time periods required to obtain  
25    the credit determination sought by the consumer.

26           4.     Over the last several years, however, the Defendants have embarked on a course of  
27    conduct, described in this complaint, the purpose and effect of which has been to weaken and  
28    eliminate credit resellers who are also horizontal competitors of theirs in selling to buyers of

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:21PM;

PAGE 7

1 credit reports. Defendants, who already control the supply of the essential product, the credit  
2 information resident in their databases, have embarked on a campaign to gain control over the  
3 distribution of that product by weakening and eliminating their competitors, the independent  
4 reseller members of the NCRA.

5         5. Defendants' unfair and deceptive business practices and anti-competitive conduct  
6 have included: 1) acquisition of firms which had previously offered access to credit information  
7 at competitive prices; 2) increasing the wholesale prices charged to credit resellers for credit  
8 reports and related services particularly relative to the lower prices offered by them for the same  
9 products in direct transactions with the customers of those resellers; 3) price discriminating  
10 against independent resellers; 4) prohibiting credit resellers from reselling reports to categories of  
11 purchasers through line of business restrictions which have the effect of eliminating competition  
12 in these lines of business and preserving these lines of business for themselves or other entities  
13 favored by them; and 5) imposing restrictions on the products resellers may offer to their  
14 customers and the charges they or their customers can charge for services, particularly rapid  
15 credit rescoring one of the most important services offered consumers seeking favorable and  
16 timely mortgage credit decisions and requiring the correction of erroneous credit information  
17 maintained and provided by the Defendants. This latter business practice creates the utterly  
18 anomalous and unfair result that the Defendants transfer the costs of correcting errors in their own  
19 databases onto credit resellers who are then restrained by the Defendants from recovering their  
20 costs for those services. In addition, the Defendants maintain the credit resellers under constant  
21 economic threat and duress by virtue of the veto power they hold over the credit resellers' very  
22 ability to do business. This coercive power results from the fact that the mortgage business  
23 requires that resellers furnish credit reports from all three of the Defendants' databases. If a  
24 reseller is deprived of access to any one of the Defendants' databases they are effectively out of  
25 the mortgage business. And because the mortgage business is such a large part of the reseller  
26 business (in part, a result of the line of business restrictions Defendants impose on the resellers),  
27 being out of the mortgage business effectively means being out of business. Knowing this, the  
28 Defendants impose oppressive contracts of adhesion on credit resellers with onerous terms and

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:21PM;

PAGE 8

1 pricing on a take-it-or-leave-it basis, reserve the right to, threaten to and in fact, conduct  
2 disruptive and oppressive audits to check compliance with the multiple contractual requirements  
3 which are onerous to observe but which frequently serve no or little useful purpose. The  
4 Defendants threaten to terminate the reseller's access to the Defendant's database and thereby put  
5 the reseller out of business for even minor non-compliance issues. Fearing such devastating  
6 retaliatory responses, resellers have little choice but to accept the Defendants' oppressive business  
7 practices and unfair pricing and are loath to complain about them.

8 6. The anticompetitive, unfair and deceptive business practices described in detail in  
9 this complaint, have had, and are continuing to have, their intended effects -- the number of credit  
10 resellers operating in the United States has plummeted in the last several years from over 1500 to  
11 a fraction of that, prices have increased, Defendants' monopoly power has been consolidated and  
12 their dominant position entrenched, choice and innovation of credit products and accuracy of  
13 credit information have suffered, and the resellers who have been able to weather these practices  
14 are cowed into acceptance of the Defendants' practices out of fear for their economic lives.  
15 Unless the Defendants' course of conduct is stopped, they will succeed in monopolizing the credit  
16 reporting business to the irreparable harm of the members of the Plaintiff and to California  
17 consumers who will lose their best allies and their easiest and most affordable vehicle for quickly  
18 resolving erroneous credit reports and credit scores in mortgage credit transactions -- credit  
19 resellers.

20 7. Plaintiff brings this action for injunctive relief and restitution to remedy and  
21 terminate these unfair, deceptive and anticompetitive business practices which are harming and  
22 threaten to harm its members, consumers in California and businesses in California that purchase  
23 credit reports and related services.

#### 24 JURISDICTION AND VENUE

25 8. Pursuant to California Code of Civil Procedure §410.10 and Business &  
26 Professions Code §§17203 & 17204, the Defendants are subject to the jurisdiction of the courts of  
27 the State of California by virtue of their extensive business dealings and transactions within this  
28 state. Injuries caused by Defendants, including violations of Bus. & Prof. Code §17200, occurred

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:22PM;

PAGE 9

1 in California. The Defendants do business in California and have sufficient minimum contacts  
2 with California or otherwise avail themselves of the credit report market in California through the  
3 marketing, promotion, issuance, sale and use of their credit reports so as to render the exercise of  
4 jurisdiction by the courts of California permissible and appropriate.

5 9. The California Superior Court has jurisdiction over this action pursuant to  
6 Constitution Article VI, § 10 which grants the Superior Court original jurisdiction in all cases  
7 except those given by statute to trial courts. The statutes under which this action is brought do  
8 not grant jurisdiction to any other trial court.

9 10. Venue is proper in this county pursuant to Cal. Civ. Proc. Code §395.5 and Bus. &  
10 Prof. Code §17203 because the Defendants conduct substantial business in the county, including  
11 selling reports, collecting credit information on, and issuing and selling credit reports about  
12 virtually every adult resident of the county.

### 13 PARTIES

14 11. Plaintiff National Credit Reporting Association, Inc. ("NCRA") is a national trade  
15 organization of consumer credit reporting agencies and associated professionals (including  
16 agencies and professionals located in California) that provide products and services to hundreds  
17 of thousands of credit grantors, employers, landlords and all types of general businesses, many of  
18 whom are located in California. Headquartered in Bloomingdale, Illinois, NCRA serves members  
19 in the United States and Puerto Rico. NCRA's membership includes mortgage credit reporting  
20 agencies, employment-screening services, tenant screening companies, consultants and a variety  
21 of affiliate vendors. Plaintiff sues as a private attorney general pursuant to Bus. & Prof. Code  
22 §17200 for injunctive relief and restitution.

23 12. Defendant Experian Information Solutions, Inc. ("Experian") is a corporation  
24 organized and existing under the laws of the State of Ohio, with its principal place of business at  
25 475 Anton Boulevard, Costa Mesa, California 92626, that does business in the State of California  
26 and the County of Alameda. Experian is a consumer-reporting agency that compiles and  
27 maintains files on consumers on a nationwide basis as that term is defined in Section 603(p), 15  
28 U.S.C. §1681a(p) of the Fair Credit and Reporting Act. Experian is one of three dominant

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:22PM;

PAGE 10

1 repositories of credit information in the United States.

2 13. Defendant Equifax, Inc. ("Equifax") is a corporation organized and existing under  
3 the laws of the State of Georgia, with its principal place of business at 1550 Peachtree Street,  
4 N.W., Atlanta, Georgia 30309 that does business in the State of California and the County of  
5 Alameda. Equifax is a consumer reporting agency that compiles and maintains files on  
6 consumers on a nationwide basis as that term is defined in Section 603(p), 15 U.S.C. § 1681a(p),  
7 of the Fair Credit Reporting Act. Equifax is one of three dominant repositories of credit  
8 information in the United States.

9 14. Defendant TransUnion, LLC ("TransUnion") is a limited liability company  
10 organized and existing under the laws of the State of Illinois, with its principal place of business  
11 at 555 West Adams Street, Chicago, Illinois 60661, that does business in the State of California  
12 and the County of Alameda. TransUnion is a consumer-reporting agency that compiles and  
13 maintains files on consumers on a nationwide basis as that term is defined in Section 603(p), 15  
14 U.S.C. § 1681a(p), of the Fair Credit Reporting Act. TransUnion is one of three dominant  
15 repositories of credit information in the United States.

16 15. Collectively, Defendants possess virtually 100% of the market for the provision of  
17 consumer credit reports in California and in the United States during the relevant time period.  
18 Together they possess nearly 100% of the capacity in California and the United States to provide  
19 consumer credit information. Because virtually all mortgage lenders require a credit report that  
20 contains information from all three of the Defendants' databases, each of the Defendants has and  
21 exercises monopolistic market power over buyers of consumer credit reports.

22 16. Defendants Does 1-50 inclusive are sued herein under fictitious names. Their true  
23 names and capacities are unknown to Plaintiff. When their true names and capacities are  
24 ascertained, Plaintiff will amend this complaint to name them. Plaintiff believes that each of the  
25 fictitiously named Defendants is responsible for the violations alleged in this complaint.

26 **FACTUAL ALLEGATIONS AND BACKGROUND ON THE**  
27 **CREDIT REPORTING INDUSTRY**

28 17. Accurate credit information is a critical aspect of millions of consumer

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:22PM;

PAGE 11

1 transactions throughout California and the rest of the country every day. For example, in  
2 purchasing a home, buying a car, obtaining a job or renting an apartment, consumers must  
3 demonstrate that their credit history is sufficiently positive to justify the particular transaction  
4 under consideration. Businesses across the country must obtain this credit information from  
5 Defendants who control the essential ingredient required for a consumer credit report, *i.e.*, the  
6 databases of that information. Plaintiff's members are important intermediaries between  
7 Defendants (also know as "the repositories" or "bureaus") and the businesses that require  
8 consumer credit information and the consumers who are seeking to consummate a transaction  
9 with those businesses. Plaintiff's members purchase credit reports directly from Defendants and  
10 then resell them to clients in California and across the country who utilize them in evaluating  
11 consumer applications for goods and services, the availability and prices of which are dependent  
12 in part on the creditworthiness of the consumer.

13 18. Participants in the credit reporting industry can be categorized into three groups:  
14 the Defendant repositories, resellers affiliated with the Defendant repositories and independent  
15 resellers. End-users of credit reports (with the exception of the large numbers and categories of  
16 end-users who are denied access to resellers because of the Defendants' anticompetitive line of  
17 business restrictions) purchase from all three segments.

18 19. Equifax and TransUnion each have subsidiaries that provide mortgage credit  
19 reports (Equifax Mortgage Services and TU Mortgage Information Systems, respectively), while  
20 Experian recently purchased a company to enter the mortgage credit reporting market. Moreover,  
21 each of the repositories has "affiliates." These affiliates act both as resellers and local credit  
22 bureaus that administer some local databases which complement the repositories' databases. All  
23 affiliates sell mortgage credit reports. Whether directly or through affiliates, each of the  
24 Defendants operate at both the wholesale (selling to Plaintiff's members) and retail (selling to  
25 end-users) levels of the credit reporting industry.

26 20. Over the past several years, as part of their ongoing effort to gain control over  
27 these markets, the repositories have been aggressively acquiring their affiliates. TransUnion now  
28 has a single affiliate that is a large, diversified company operating in five territories (the CBC

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:23PM;

PAGE 12/26

1 Companies). Equifax is affiliated with nine companies, including CSC Credit Services, which  
2 operates in 52 territories. Experian, which started its affiliate acquisition program last year, has  
3 30 affiliates. Whether directly or through affiliates, each of the three dominant repositories  
4 operate at two levels of the credit reporting industry, providing credit reports at "wholesale" to  
5 resellers and also at "retail" to end-users.

6 21. Many of the NCRA member independent credit resellers are smaller entities than  
7 the repositories or their affiliates. As such, these smaller, local resellers provide an important  
8 benefit for consumers, because they frequently provide enhanced services in the mortgage lending  
9 context that quickly, in the short time periods required for credit decisions, verify, update, and  
10 correct data that appears on credit reports. This process promotes the interests of its clients who,  
11 with accurate credit information, may be able to extend a favorable credit decision which it could  
12 not in the absence of correct information, thereby placing, for example, a loan it might otherwise  
13 not have placed. This process also promotes the interests of consumers who, with accurate credit  
14 information, may gain access to a mortgage loan, or obtain more favorable pricing for that loan,  
15 such as where accurate information allows the consumer to qualify for a lender's lowest interest  
16 rate, rather than the higher rates charged in the sub-prime segment of the market. For reasons  
17 discussed more fully below, the smaller resellers are structured to be able to, and in fact do,  
18 devote a much greater proportion of their resources to providing enhanced services such as rapid  
19 credit report correction – which allows for correction of errors in the Defendants' databases and  
20 decisions based on accurate consumer credit information – than do the repositories or the larger  
21 resellers.

22 22. The current industry structure is the result of three broad trends over the past five  
23 years, corresponding roughly with the introduction of automated underwriting and risk-based  
24 pricing and the 1996 amendments to the Fair Credit Reporting Act. The first is the tendency of  
25 credit bureaus with their own databases to be acquired by the national repository with whom they  
26 are affiliated. The second broad trend is the reduction in the ranks of independent resellers.  
27 Finally, there is a tendency for mortgage lenders or title companies to acquire mortgage credit  
28 reporting agencies. In addition to the vertical integration of Countrywide and Landsafe, First

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:23PM;

PAGE 13/26

1 American Title Company owns Credco, the largest independent reseller; Fidelity National  
2 Financial (acquirer of the former Chicago Title Company) owns Fidelity National Credit  
3 Services, an Experian affiliate; and Land-America Financial Group, Inc. has recently acquired  
4 Info 1, the fourth largest independent reseller. All three trends appear to be continuing.

5 **THE PERVASIVENESS AND ADVERSE IMPACTS OF CREDIT REPORTING AND**  
6 **CREDIT SCORING ERRORS**

7 23. Credit histories have long been an important factor in decisions to extend or deny  
8 credit and in the price of credit. Historically such decisions required a human review of the  
9 information in an individual's credit history and an evaluation of the likelihood the individual  
10 would timely repay a loan. Now computer models that produce numerical scores are used to  
11 automate the credit evaluation process and produce quick credit assessments.

12 24. During the second half of the 1990's, mortgage underwriting increasingly  
13 incorporated credit scores and other automated credit history evaluations. By 1999 the  
14 underwriting of 60 to 70 percent of all mortgages employed an automated credit evaluation, a  
15 trend which has continued.

16 25. The use of automated credit scoring and credit history evaluation goes beyond  
17 their application in credit decisions. In a practice commonly referred to as "risk-based pricing,"  
18 credit scores are used to price mortgages and other consumer credit, as well as private mortgage  
19 insurance (required on all mortgages with down payments of less than 20%). Even very small  
20 differences in credit scores that can and often do result from inaccurate information or the  
21 omission of information in the Defendants' databases can result in substantially higher rates, and  
22 less favorable terms on new loans.

23 26. Lenders also use credit scores and automated credit histories to evaluate existing  
24 credit accounts, to decide whether to change credit limits, interest rates or other terms.

25 27. Employers and landlords also use automated credit scores/credit histories.  
26 Landlords use the information to determine if a potential tenant is likely to pay rent in a timely  
27 manner. Employers will review this data during the hiring process, particularly if an applicant is  
28 to be bonded. Utility, telephone and cellular companies may also request an automated credit

1 report to determine whether and on what terms to offer service.

2 28. Insurance companies also use credit scores and insurance scores (derived from the  
3 same automated credit histories) as a basis to deny coverage for new customers, refuse renewals  
4 of coverage, and raise premiums.

5 29. Thus, a consumer's credit record and corresponding credit score can determine  
6 both access to, and the pricing of, the most fundamental financial and consumer services. The  
7 increased use of automated credit evaluations has brought about a number of abuses that have  
8 harmed California consumers in the form of denied access to credit or materially increased costs  
9 of credit.

10 Customized or risk-based pricing

11 30. Automated credit scores increase the potential for customized credit pricing based  
12 on the risk an individual poses (as reflected in the credit score). These scoring systems allow  
13 lenders to extract greater profits from consumers who do not attain target credit scores. Risk-  
14 based pricing, automated scoring and this potential for increased profits create disincentives for  
15 maintaining accurate credit data, insuring that a consumer's credit report contains accurate credit  
16 information, and helping consumers correct errors in their credit records.

17 31. As a result, consumers with inaccuracies in their credit reports (and corresponding  
18 credit scores) may unnecessarily be charged higher rates for credit.

19 Statistical Validity

20 32. While automated credit scoring may have statistical validity, and may be  
21 predictive of repayment behavior for large populations, credit-scoring models are not perfect  
22 predictors of individual credit-worthiness. Businesses who manage large numbers of accounts  
23 priced by credit risk have a greater tolerance for errors in credit scoring than consumers. These  
24 businesses can balance credit report errors in their favor against errors in favor of consumers; so  
25 long as enough consumers are charged higher rates based on inflated risk assessments to cover  
26 losses from those incorrectly assessed low risk and charged lower rates, these businesses will  
27 suffer no material harm. A consumer however, will have no tolerance for errors in transactions  
28 governed by credit scoring and credit reports -- if the consumer is denied a product or service,

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:24PM;

PAGE 15/26

1 such as a loan, or is overcharged for that loan, because of a credit scoring system error, there is no  
2 countervailing rebate to the consumer to even the statistical scale and no comfort in the overall  
3 validity of credit scoring for the population of the lender's portfolio.

4 **Inaccurate Credit Reports**

5 33. The most fundamental credit scoring issue is the accuracy of the credit data upon  
6 which the credit score is based. Inaccuracies in credit reports that result in a denial of credit or  
7 insurance, higher credit or insurance costs, or a loss of housing or employment cause irreparable  
8 harm to the consumer. A 1998 study by the Public Interest Research Group found that 29% of the  
9 credit reports it reviewed contained errors that could result in the denial of credit; 70% of the  
10 reports contained an error of some kind. Consumers Union asked consumers in 1991 to review  
11 their credit reports for accuracy: 20% of the reports contained a major inaccuracy that could affect  
12 the consumer's credit eligibility, and 48% contained inaccurate information of some kind.  
13 Almost half the reports surveyed omitted some of the consumer's current accounts. A 2000  
14 Consumers Union survey found that more than 50% of the credit reports reviewed contained  
15 inaccuracies with the potential to result in a denial, or higher cost of credit.

16 34. In December 2002, the Consumer Federation of America and the National Credit  
17 Reporting Association published the results of a study entitled "Credit Score Accuracy and  
18 Implications for Customers." The CFA/NCRA report included the following findings:

19 a. *Omissions of all kinds of information from the credit reports was a*  
20 *common occurrence.* Over 78% of the files were missing a revolving account in good standing.  
21 One third of the files omitted a mortgage account that had never been paid late. 67% of the files  
22 were missing another type of installment account that had never been paid late. Positive account  
23 information is especially important for consumers who are beginning to establish credit, or who  
24 are trying to re-establish their credit rating after bankruptcy. Omitting positive information can  
25 have a dramatically negative impact on these consumers.

26 b. *Many consumer files contained conflicting information about the*  
27 *consumer's record of late payments.* In 43% of the files, reports on the same accounts conflicted  
28 about how often the consumers had been late by 30 days. In almost 30% of the cases there was

SENT BY: HULETT HARPER STEWART LLP;

MAR-25-04 3:24PM;

PAGE 16/26

1 conflicting information about how many times the consumer had been 60 days late, and in almost  
2 24%, conflicting information about the number of times an account had been 90 days past due.  
3 Delinquencies are a major contributing factor to a consumer's score, and a consumer can be  
4 harmed by a report that indicates an account is past due when it is not.

5 c. *Account balances and credit limits were inconsistently and incorrectly*  
6 *reported.* One of the most frequently provided explanations for a consumer's credit score is that  
7 the proportion of balances to credit limits on revolving accounts is too high. This was the  
8 primary explanation listed on 1 in 6 reports reviewed by CFA/NCRA.

9 35. CFA/NCRA reached the following conclusions and implications for consumers in  
10 the December 2002 report:

11 a. *Credit scores and the information in credit reports vary significantly*  
12 *among repositories.* The wide range in scores reflects the broad variation in data in each  
13 repository report, as well as missing, incorrect and inconsistent information in the reports.

14 b. *Tens of millions of consumers are at risk of being penalized for incorrect*  
15 *information in their credit report, in the form of increased costs or decreased access to credit*  
16 *and vital services.* Errors in credit reports that produce a lower score can unfairly cost the  
17 consumers higher loan pricing, or even disqualify the consumer. The CFA/NCRA study found  
18 that one in five consumers – 22% or over 40 million Americans – is at risk of misclassification  
19 into the sub-prime, higher priced lending market because of errors or inaccuracies in the  
20 consumer's credit report. Falling below the cutoff score for a prime rate mortgage can add a  
21 tremendous financial burden to the consumer, as sub-prime rates can be as much as 3.25 points  
22 higher. Credit report and scoring errors can cost an individual consumer hundreds of thousands  
23 of dollars in interest payments. Moreover these numbers do not quantify those who are being  
24 overcharged because error pushed them into higher pricing within the prime or sub-prime  
25 markets. Nor do these numbers address the consumers with errors in their credit reports or scores  
26 who are penalized with higher credit card rates and insurance premiums, or who are denied  
27 insurance, housing, utility service or employment.

28 c. *Almost one in ten consumers runs the risk of being excluded from the*

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:24PM;

PAGE 17/28

1 *credit marketplace altogether because of incomplete records, duplicate files and mixed files. If*  
2 *a consumer has little credit history or has just emerged from bankruptcy, every positive account is*  
3 *vital for creating a record that has enough information to be scored. Yet consumers have very*  
4 *little control over the inclusion in their credit record of duplicate files or mixed information not*  
5 *belonging to them. When a lender requests a scored report on a consumer, but a repository is*  
6 *unable to return a score (as was the case for one in ten files reviewed in the study), the lender may*  
7 *choose to set aside the application in favor of applications with enough credit to be scored, and*  
8 *priced with minimal work. When and if the lender returns to the un-scored file once loan*  
9 *processing volumes have subsided (because of seasonal home buying fluctuations or rising*  
10 *interest rates), the consumer will have suffered substantial harm by being excluded – even*  
11 *temporarily – from the marketplace.*

12 **BACKGROUND ON THE WHOLESALE MARKET FOR CREDIT REPORTS FOR**  
13 **MORTGAGE LENDING**

14 36. Residential mortgage loans make up a large portion of Plaintiff's members'  
15 business. Residential mortgage loans are originated both by depository institutions (commercial  
16 banks and savings institutions) and non-depository institutions (mortgage bankers, mortgage  
17 brokers, and others). Some of these loans involve some form of government sponsorship. For  
18 example, the Federal Housing Administration ("FHA"), created in 1934, insures loans made by  
19 private lenders to protect the lender from default and foreclosure risk, and the Veterans'  
20 Administration ("VA") guarantees loans made by private lenders to U.S. veterans. The vast  
21 majority of mortgage loans, however, are not insured or guaranteed by the government.

22 37. The value of mortgage loans outstanding in 1996 was \$4.86 trillion, a figure that  
23 by 2002 had grown to over \$8.48 trillion, more than 75% of which represents mortgages on  
24 single-family homes. Over 70% of all mortgage loans are sold in the secondary market rather  
25 than being held in the lenders' portfolios. The secondary market is dominated by government-  
26 sponsored entities ("GSEs"), i.e., the Federal Mortgage Association ("FNMA," or "Fannie Mae"),  
27 the Federal Home Loan Mortgage Corporation ("FHLMC," or "Freddie Mac"), and the  
28 Government National Mortgage Association ("GNMA," or Ginnie Mae), along with the United

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:25PM;

PAGE 18/26

1 States Department of Housing and Urban Development ("HUD"). Both FNMA and FHLMC are  
2 federally chartered, private corporations whose stock trades on the NYSE. Both purchase single  
3 family and multifamily FHA/VA and conventional mortgages. These mortgages are either held  
4 in portfolios or sold to investors after being packaged into mortgage-backed securities ("MBSs").  
5 Neither entity can originate mortgage loans. FNMA-issued MBSs and their portfolio account for  
6 23% of the residential mortgage market, while FHLMC-issued MBS's and portfolio loans  
7 account for about 16%.

8 38. Importantly, Fannie Mae, Freddie Mac and Ginnie Mae require that mortgage  
9 loans they purchase conform to strict underwriting standards, taking into account the borrower's  
10 credit record, employment outlook, the adequacy of the secured property, and the adequacy of the  
11 borrower's income. Principle, interest, taxes and insurance, for example, must satisfy certain  
12 ratios to gross income for conventional loans. As a result of this requirement, banks and other  
13 institutions making mortgage loans are required to obtain credit history information from all three  
14 of the Defendants before consummating any single transaction. More specifically, with respect to  
15 a borrower's credit history, loans purchased by Fannie Mae, Freddie Mac and Ginnie Mae must  
16 be based on risk scores calculated from data from all three Defendants, each of whom has a  
17 national credit information database.

18 39. The principle concern here is the credit history, which for GSE-conforming loans  
19 must be based on risk scores calculated from data from all three of the dominant credit reporting  
20 agencies Equifax, TransUnion and Experian, the Defendants in this case. Before the advent of  
21 automated underwriting, some mortgage lenders discovered that additional credit information was  
22 often uncovered when credit reports from all three repositories were analyzed.

23 40. Credit reports incorporating data from all three repositories are sometimes called  
24 "tri-merged" reports, or 3-bureau reports. This so-called "tri-merge" requirement means that the  
25 data from each of the Defendants is necessary for any residential mortgage loan transaction. In  
26 1996, when FNMA and FHLMC updated their underwriting guidelines to accommodate  
27 automated underwriting, the requirement for tri-merged reports was adopted.

28 41. Each GSE has established a proprietary automated underwriting system. FNMA's

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:25PM;

PAGE 19/28

1 system is know as the MORNETPlus® Network, and includes components know as the Desktop  
2 Originator® and Desktop Underwriter® ("DO/DU"). FHLMC's automated systems are known  
3 as Gold Works® and Loan Prospector® ("LP"). While both GSEs require tri-merged reports,  
4 their procedures for obtaining them differ. FNMA has established a network of 13 "sponsors," 12  
5 credit reporting agencies and one trade association (the National Credit Reporting Association,  
6 the Plaintiff herein) which provide access and interface to the DO/DU system. The lender-  
7 customers of these agencies obtain loan approvals through their automated system in part based  
8 on the tri-merged credit reports. By contrast, the FHLMC obtains credit reports from each of the  
9 three repositories directly, and involves resellers only when correction, updating, or re-scoring is  
10 required. Access to LP is provided through one of five FHLMC credit-reporting sponsors that  
11 service 100 resellers. HUD employs a "private label" version of DO/DU that is more flexible,  
12 and although they also require tri-merged reports they also continue to accept a 3-bureau version  
13 of the pre-automation format known as the Residential Mortgage Credit Report.

14 42. Due to the tri-merged report requirements and their sole possession and control of  
15 access to their respective credit information databases, each of the three repositories controls an  
16 essential input for the preparation of credit reports for mortgage loan purposes and acts as a  
17 gatekeeper to that information. Thus, each repository possesses market power.

18 43. The requirement for tri-merged reports creates in each of the repositories a "veto-  
19 monopoly" in the wholesale market for consumer credit reports for mortgage lending, i.e., market  
20 power based on the necessity that resellers of consumer credit reports for the underwriting of  
21 conforming mortgage loans have access to data from all three repositories.

22 44. Credit reporting agencies like Plaintiff's members are often involved in these  
23 residential mortgage transactions because credit information maintained by the repositories is not  
24 always accurate or complete. In particular, Plaintiff's members are often retained by businesses  
25 and institutions to purchase credit reports for their transaction because they know that, frequently,  
26 there will be a need for correction, updating, or re-scoring of the particular consumer's  
27 information.

28 45. Because Fannie Mae, Freddie Mac and Ginnie Mae control such a large proportion

SENT BY: HULETT HARPER STEWART LLP;

6193301139;

MAR-25-04 3:25PM;

PAGE 20/28

1 of the secondary market for residential mortgage loans, credit report resellers like Plaintiff's  
2 members that cannot provide tri-merged reports cannot operate a viable mortgage credit reporting  
3 business.

4 46. Plaintiff's members have no alternative but to continue to purchase credit reports  
5 from all three repositories regardless of cost. Thus, each of the Defendants controls the essential  
6 input in the market for mortgage credit reports created by the tri-merge requirements in the  
7 Fannie Mae/Freddie Mac/Ginnie Mac underwriting guidelines, the credit information itself.

8 **DEFENDANTS' ANTICOMPETITIVE ACTIVITIES IN THE CREDIT REPORTING**  
9 **MARKET**

10 47. Smaller resellers face substantial difficulties and are being driven out of business  
11 because of the Defendants unfair, deceptive and anti-competitive business practices. Operating at  
12 two levels of distribution means that the Defendants and their affiliates are both suppliers to and  
13 competitors of the independent resellers. Where, as here, the supplier possesses market power, it  
14 may raise its wholesale price to the distributor while lowering its retail price to the distributor's  
15 customers. Without competing suppliers to turn to, the distributor is squeezed from the relevant  
16 markets. That conduct has occurred in this market. The wholesale costs to resellers for credit  
17 reports and risk scores and ancillary products (such as the fraud checks required by the GSEs) and  
18 re-scoring have increased, while prices and terms of access to their affiliates and retail prices for  
19 the same products offered directly to end-users by the repositories have declined. Similarly,  
20 repositories use these advantages to unfairly compete for the reseller's clients (whom resellers are  
21 required to disclose to them) and client prospects by offering prices that are at or below wholesale  
22 and, thus, impossible for the resellers to match.

23 48. In addition, two of the three repositories prohibit their affiliates from competing  
24 outside their assigned territories precluding direct access by resellers to these potential alternative  
25 sources of credit information.

26 49. Defendants price discriminate in favor of larger, affiliated or favored resellers.  
27 While they sometimes justify the disparate treatment of the larger resellers on the basis of volume  
28 discounts, that justification does not withstand scrutiny. In such a highly automated industry

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:26PM;

PAGE 21/26

1 where the marginal cost of transmitting a credit report is virtually, if not actually nil, such  
2 discounts are not likely to be proportional to any volume-related costs savings. Moreover, the  
3 volume discounts, where they exist at all are much thinner to resellers than they are to end-users.

4 50. Moreover, since the passage of the 1996 amendments to the FCRA – which  
5 required sellers to identify the use for which a credit report is requested and the identity of the  
6 credit report end-user – the contract terms under which the repositories supply products to  
7 resellers have become increasingly restrictive. Prior to the 1996 amendments to the FCRA,  
8 resellers were not routinely prohibited from engaging in any line of legitimate business involving  
9 the furnishing of credit reports, i.e., in addition to mortgage reporting and tenant and employment  
10 screening, resellers could furnish reports for any permissible purpose under the FCRA. Since  
11 then, however, with few exceptions, all three repositories have prohibited the smaller resellers  
12 from furnishing reports to auto dealerships, credit card companies, consumer finance companies,  
13 directly to consumers, or for any other permissible purpose that did not involve a real estate  
14 transaction, employment, or tenant screening. In spite of the fact that such provisions foreclose a  
15 substantial share of the credit report market (from which favored resellers with a larger volume of  
16 transactions are not foreclosed), smaller independent resellers have had no choice but to accept  
17 these restrictions to their own detriment and to the detriment of customers in these business  
18 segments which are deprived of access to the enhanced services, products and competition  
19 resellers offer.

20 51. Defendants' anticompetitive practices also include placing unjustified restraints on  
21 resellers pricing practices with respect to rescoring. Rescoring is a means by which consumers  
22 can have erroneous or stale information in their credit file corrected in a matter of days to avoid  
23 having a credit or other transaction derailed. Although the FCRA requires corrections of credit  
24 file errors to be made within 30 days, the actual elapsed time between discovery of an error and  
25 obtaining a new risk score may be even longer. When the origination process has already  
26 commenced, a month or more may be too long of a delay to allow the borrower to close the loan  
27 on the terms originally offered. Rescoring is an increasingly popular device to avoid the  
28 consequences of rejection by an automated underwriting system on account of erroneous or

1 inaccurate information in the credit file that has lowered the borrower's risk score.

2 52. Although rescoring services promote the making of credit decisions based on  
3 accurate and up-to-date information, have proven popular with lenders and borrowers, and  
4 resellers routinely offer them, all of the repositories prohibit resellers from charging the consumer  
5 "directly or indirectly" for such services. The Equifax reseller agreement, for example, includes  
6 an addendum dealing with their "Rapid Resolve" rescoring service. Under paragraph 4. of the  
7 addendum, entitled "Responsibilities of Client and Equifax," the agreement states:

8 **Client will: \* \* \* (vii) ASSURE THAT ANY COSTS OR FEES**  
9 **EQUIFAX CHARGES CLIENT FOR THE SERVICE WILL**  
10 **UNDER NO CIRCUMSTANCES BE CHARGED BACK TO**  
11 **THE CONSUMER, EITHER DIRECTLY OR INDIRECTLY.**

12 53. This remarkable provision appears to require either that the reseller absorb the cost  
13 of re-scoring, or insist that its customer (*i.e.*, a lender or mortgage broker) do so, since passing on  
14 such costs to the borrower clearly involves an "indirect" charge to the consumer.

15 54. Not surprisingly, the mortgage brokers – whose customers benefit from the more  
16 accurate credit file, higher risk score, and lower mortgage interest rate which often results from  
17 rescoring – resent being told by their credit reporting agency that the fees charged for such  
18 services may not be charged to the borrower. The following excerpt is from the March 2003  
19 issue of the official publication of the National Association of Mortgage Brokers:

20 Also our NAMB representatives have traveled around the country  
21 to teach mortgage brokers and lenders about credit scoring, they  
22 consistently heard this complaint: "My credit report company tells  
23 me I can't change a consumer for rapid re-scoring." Our trainers  
24 have spent a great deal of time explaining that the reseller is  
25 misinterpreting their contract with the repository. \* \* \* Even though  
26 the consumer's information on file at a repository gets modified or  
27 updated as a by-product of the rescoring process, this is not the  
28 same as a credit repair. It seems to me that the fastest way to spoil  
this wonderful new service by making it look like a credit repair  
would be for repositories to insist that credit resellers restrict  
mortgage brokers and lenders from charging a fee to the consumer  
for the upgraded credit report. NAMB's trainers are instructing  
mortgage brokers and lenders to have the consumer write a check  
for the upgraded re-scored report directly to the broker's or lender's  
company or their trust account. *We are also encouraging mortgage  
professionals to shop around if their current provider of credit  
reports continues to hold the line on this baseless policy.*

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:27PM;

PAGE 23/28

1 National Mortgage Broker, vol. 19, no. 3, March 2003, p. 24 at 25 [emphasis added].  
2 Resellers faced with the prospect of audits and termination by the repositories, are understandably  
3 reluctant to deviate from the express terms of their contracts which are provided to them on a  
4 take-it-or-leave-it basis. But at the same time, they are loath to be perceived by their customers as  
5 "holding the line on a baseless policy" which costs their customers money. The repositories have  
6 been asked to clarify the rules, but have so far refused to do so. Thus, while rescoring is a  
7 permissible business for resellers, the repositories have made it difficult or impossible for  
8 resellers to profit from it without risking the alienation of its customers.

9 55. Defendants unfair, deceptive and anticompetitive business practices also include  
10 the imposition of oppressive contracts of adhesion on resellers presented on a non-negotiated,  
11 take-it-or-leave-it basis. These contracts and policies developed pursuant to such contracts  
12 include the right to conduct disruptive and oppressive compliance audits with little or no notice or  
13 process. These Defendants reserve the right to terminate the reseller's access to the Defendants'  
14 database, the equivalent of an economic death sentence for the reseller's business and the  
15 Defendants hold the threat of terminating resellers for even minor non-compliance with a wide  
16 range of contractual requirements which are frequently of little if any real importance. This  
17 coercive power presents a constant threat to the reseller's livelihood which the Defendants exploit  
18 to their own advantage.

19 56. Defendants' anticompetitive conduct described above has injured California  
20 residents and threatens to continue to injure them, because, among other things, it has had, and  
21 tends to have, the following effects: 1) increasing, above competitive levels, the prices of credit  
22 reports and related services; 2) reducing the accuracy of Defendants' credit reports and  
23 perpetuating errors in their databases; 3) reducing the quality, variety and output of credit  
24 information products and services; and 4) restricting and eliminating competition in the provision  
25 of credit reports and related services. Defendants' wrongful conduct described above (i) violates  
26 state and federal antitrust laws and threatens incipient violations of those laws and violates the  
27 policy and spirit of those laws because the effects of Defendants' conduct are comparable to or  
28 the same as a violation of those laws, and (ii) significantly threatens to harm competition in the

1 credit information industry. Defendants' anticompetitive conduct will continue to threaten the  
2 viability and existence of the remaining resellers, extinguishing competition and harming  
3 Californians whose financial and economic livelihoods are critically dependent upon accurate and  
4 competitively priced credit reports.

5 57. Defendants' practices are deceptive because while Defendants proclaim to be in  
6 the business of providing accurate, complete and reliable consumer credit information in a  
7 competitive market, the errors in their consumer credit reports and consumer credit scores are  
8 common, and the business practices alleged in this complaint have the effect of perpetuating and  
9 concealing the errors in those databases and perpetuating the denial or erroneous pricing of  
10 products because of credit reports generated from the Defendants' databases that contain  
11 erroneous or incomplete credit information. Defendants' conduct is designed to restrict access to  
12 and ultimately remove from the marketplace the one fair, prompt and effective means of credit  
13 record correction – the credit resellers. Without the resellers available to provide fair, prompt and  
14 effective credit data correction in mortgage loan transactions, California consumers and the  
15 California businesses that seek accurate credit information about their customers stand exposed to  
16 the adverse impacts of inaccurate credit records or scores.

#### 17 FIRST CAUSE OF ACTION

18 (For Unfair and Deceptive, Unlawful and Fraudulent Practices in Violation of California  
19 Business and Professions Code §§17200, *et seq.*)

20 58. Plaintiff incorporates by reference the allegations set forth in the preceding  
21 paragraphs. These claims are brought on behalf of the general public against all Defendants.

22 59. California Business and Professions Code §§17200, *et seq.*, prohibit acts of unfair  
23 competition. Section 17200 defines unfair competition to mean and include any "unlawful, unfair  
24 or fraudulent business act."

25 60. For the reasons stated in this complaint, Defendants' unfair, unlawful and  
26 deceptive business acts and practices described herein present a continuing threat to all California  
27 consumers, California businesses who need to access accurate credit information and the products  
28 and services offered by credit resellers and members of the general public.

SENT BY: HULETT HARPER STEWART LLP;

6193381139;

MAR-25-04 3:27PM;

PAGE 25/26

61. WHEREFORE, Plaintiff prays for judgment and relief against Defendants as set forth hereafter.

**PRAYER FOR RELIEF**

Plaintiff on behalf of the general public prays for judgment and relief against Defendants as follows:

- a. For an order enjoining Defendants from continuing to engage in, use or employ the anticompetitive practices described herein;
- b. For restitution in an equitable amount for the amounts paid by credit resellers in California to Defendants Equifax and TransUnion and for such restitution paid by all resellers in the United States to Defendant Experian in the four years preceding the filing of this complaint.
- c. For reasonable attorneys' fees and costs of suit;
- d. For interest as prescribed by law; and
- e. For such other and further relief as the court deems just and proper.

**JURY DEMAND**

Plaintiff demands a trial by jury as to all issues and claims for which a jury trial is allowed, including those claims as may be added to this matter in subsequent amendments to the complaint.
